NOTICE TO IBM PC®  
& COMPATIBLE USERS

We have repackaged our IBM QUICKTRIEVE®, QUICKMANAGER®, etc. system and have upgraded the software to take advantage of user suggestions and general improvements. The new QUICKTRIEVE system is about to be released as version 3.0. This package will include QUICKTRIEVE, QUICKMANAGER, QUICKPLOT®, and a limited QUICKSTUDY® capability. QUICKSTUDY is only limited by the volume of information that can be saved on the diskette. The new release fee for version 3.0 is \$20.

ADVANCED IBM QUICKSTUDY

We also are preparing an Advanced QUICKSTUDY disk which will hold all of the studies on the new release described above, plus many others. We are soliciting your ideas to prepare this new disk. Do not submit proprietary or copyrighted material.

If you have an original pet study that you would like to share with others, please send it to us. If we use it on our Advanced QUICKSTUDY disk, you will receive the new disk with all studies, free of charge. Anyone may receive the new Advanced QUICKSTUDY disk by purchasing \$80 worth of historical data.

This is your opportunity to get your most used study programmed free of charge. CSI reserves the right to make modifications based on appropriateness, computing speed, storage consumption, and ease of use.

Based upon your response, we will construct a priority list for the most requested studies. Your input, on the enclosed questionnaire, will be helpful to get you what will benefit you most.

ELIMINATE CALL WAITING INTERFERENCE

One of our Atlanta customers advises us that the telephone company has enabled a function to inhibit call-waiting in the Atlanta dialing area. By prefixing \*70 before the number you are calling, service will not be interrupted. Thank you, John Pilger, for passing this along to our customers.

CASH PRICE INFORMATION

Starting with the September 1986 contract, the CME feeder cattle contract will no longer be settled through physical delivery. Instead it will be settled in cash.

The cash settlement is based on a seven-day average of cash market prices for feeder steers in 27 states, calculated by Cattle Fax, a nonprofit Colorado corporation that provides information to cattle producers.

CSI will use this price as the cash price for CSI Feeder Cattle, #33, beginning May 1, 1986.

LATE FEE EXPLANATION

APOLOGIES TO OUR CUSTOMERS for the confusion caused by our April Newsletter in our reference to "Late Payment Fees". We neglected to mention that the \$10 reactivation fee and the 1.5% late charge fee only applies if your account is 60 or more days past due. We regret this omission.

QUICKMARKET ANALYZER

For the Apple, this system has been expanded to accept CSI's intra-day data feed. A special utility disk is available which will distribute intra-day 15-minute interval data onto files that appear as standard daily data files. I hope to give further details on this and other products in our next newsletter.

QUICKQUOTE

Users should be back on line in about one week. Due to an exchange line format change, we had to suspend our QUICKQUOTE service. The format change and numerous suggestions from users on how to improve

this service were two matters addressed simultaneously. The new product should be vastly improved and the scope of coverage will be increased.

QUICKMONEY

Programming efforts were temporarily suspended while we addressed the format change cited above. We are back to work on this project and hope to have an announcement about its release very soon.

PAID ADVERTISERS

We have enclosed two paid advertisements in this month's letter: A software offer from Louis Mendelsohn of Investment Growth Corporation and a home study course from North American Chicago Corporation.

SPECIAL OFFER

Dr. Alexander Elder has a \$1.00 SPECIAL OFFER for CSI customers. The "ELDER VIEWPOINT OF FUTURES" newsletter offers "trading advice, based on chart interpretation, computer analysis and PERPETUAL INDEXES. Technical indicators described and explained". You may obtain the next two issues by sending \$1 (and mentioning CSI) to EVF, Box 20555, Columbus Circle Station, New York, NY 10023.
