QUICKTRIEVE / QUICKMANAGER 4.0

The CSI staff would like to wish everyone a happy and safe Memorial Day Weekend. We will be closed for voice contact on Monday, May 28th, Memorial Day observed.

We began sending out this new release on Friday, April 27th, about three weeks later than we expected. The delay was caused by the late delivery of the new manuals from the printer and some last minute errors that were uncovered in the software. As of this time all known problems have been corrected. If you ordered this new release (\$37.00 for domestic users and \$68.00 for foreign users - both inclusive of postage and handling), please let us know if you find any problems or incompatibilities between the software and the manual.

We plan to mail the new release to customers in their ordered sequence. If you need yours immediately, please leave your User ID with Mary, our receptionist, and she will attempt to expedite your order. She will also have a list of those that were mailed if you care to check the status of your order.

ATTN: FOREIGN USERS

Stock splits Page 2

The new QUICKTRIEVE / QUICKMANAGER version 4.0 is especially friendly to foreign customers who can now reach CSI from over 100 major foreign cities. We have eliminated the need for many foreign users to open an account with their local PTT. Most foreign users can now access CSI as easily as a caller local to Boca Raton, Florida where CSI's facilities are located.

ATTN: TELENET USERS

QUICKTRIEVE and QUICKMANAGER are registered trademarks and service marks of Commodity Systems, Inc.

We expect to install a new X.25 pad at our computer facility that will help simplify incoming call processing. We will offer up to 1200 baud service initially that will service all customers using baud rates of 300 or 1200. Users of 2400 baud modems can use Tymnet now. We will offer 2400 baud through Telenet at a later date. All Telenet users will require the dialogue file that uses the 305644 port number and the password of 136076 and the
