FREE QUICKTRIEVE UPDATE

FOR NETWORK USERS OR LONG DISTANT USERS
WILLING TO SWITCH TO NETWORK USE

Here is an opportunity to get the many new changes and improvements that we have continually added to QUICKTRIEVE[®] free of charge. This offer expires on May 15, 1988 and is subject to one minor condition: You must switch to Compunet as your primary network access carrier.

QUICKTRIEVE was last modified on March 1, 1988. If you have not ordered a new update since this date you are eligible for the free update. When we initially introduced Compunet to you a couple of months ago the dialog file on the disk mailed to some users had an extraneous period (.) in one of the user prompts. This caused an inadvertent and significant delay in the time to log on to CSI. This problem has been corrected on the new release.

Compunet's method of charging for their service, although similar to Telenet and Tymnet, has definite advantages to CSI should the volume of usage among all customers significantly increase. This is why we are trying to influence our users to switch. High volume usage of Compunet may make it possible for CSI to get started in the real time vending of intra-day data with only a modest increase in investment.

To get the new release simply notify us either by phone, through the customer subsystem, or by making a notation on the enclosed monthly invoice. If you order the update we want you to make immediate use of it. Since we cannot afford the expense of providing the new update unless you actually install it, we will have to charge your account \$5.00 if you order it and do not become a regular user of Compunet before May 15, 1988.

The free update will not be accompanied by a new manual. If you want the latest manual, please request one and we will charge your account a discounted \$10.00 new manual fee. (The regular price for a new manual is \$15.00)

This offer does not apply to non-daily accessors (history only customers) or rural customers who require an 800 WATS number to access the data retrieval service. The Compunet service, as we have arranged it, does not accommodate 800 number users.

RECENT QUICKTRIEVE ADDITIONS AND ENHANCEMENTS

Here are some of the new improvements we have made to the IBM QUICKTRIEVE system in the past six months:

1. Automatic file creation when distributing historical data for QUICKTRIEVE and ASCII files.
2. Move a file routine enhancement gives you the ability to move all or selected files to separate or same drive without having to create the files. Remember at the end of the year the problems of rolling over contracts (perpetual and stock files). This function will allow the move and creation and the extension of a data file in one easy step.
3. QUICKTRIEVE now can handle up to 250 files under each sub-directory for use with Computrac or Metastock.
4. Full week collection now available to collect up to 85 daily contract.
5. The ability to send customer subsystem messages during your normal daily collection routine, and to printout customer subsystem files.

QUICKTRIEVE USERS OF OPTIONS

The QUICKTRIEVE daily collection format does not allow transmission of an opening price. To compensate for this, the daily distribution routine creates an opening price by averaging the high and low. This opening price calculation is done twice, once when writing the data to the data file, and once when creating the distribution listing. When writing to the data

file, QUICKTRIEVE uses the conversion factor and calculates the correct value. When creating the distribution listing, however, the calculation may be incorrect because the conversion factor is not used. This programming error has been corrected in the new version of QUICKTRIEVE.

NOTES FROM OUR MARKETING DEPARTMENT

CSI now offers all NYSE stocks on a daily basis. Also available from the CSI MARSTAT database is over 100 mutual funds, American as well as over the counter stocks on a daily and historical basis.

If you need further information or wish to add any to your portfolio, please call our order department or customer service.

A NEW SERVICE TO CONSIDER

Dr. Alexander Elder, a noted trader and a long-term client of CSI, has formed a company to offer intensive day-long seminars with top market experts. The first seminar will teach Principles of Technical Analysis, featuring John J. Murphy, author of best-selling book Technical Analysis Of Futures Markets. Dr. Elder will teach his Triple Screen trading system at the same seminar. It will be held on Sunday, April 24th in New York City from 10AM to 5PM. The cost is \$300, with a full refund guarantee up through the first morning session. For more information and schedule of future meetings, please call Financial Trading Seminars at (800)458-0939 or (212)432-7630 or write to FTG, P.O. Box 20555, Columbus Circle Station, New York, NY 10023.

ADVERTISEMENT ENCLOSED

This month's advertiser is Douglas Bry of Technical Trading Strategies, Inc. announcing his new release of the Volatility Breakout System software. We accept advertisements to accompany our New Journal for the sole purpose of defraying postage costs.

CSI DOES NOT STAND BEHIND OR ENDORSE THE PRODUCTS OF ANY OUTSIDE FIRMS.

**CSI ERROR REPORT
MARCH 1988**

The following errors were found after the data was first released. They may or may not affect a user depending upon the time of access. The figures in bold print represent the corrected values. The total and individual volume and open interest are presented in raw form ready for input into your IBM computer. The specific notation requirement of QUICKTRIEVE would require a raw open interest value of 294070, for example, to be stored as 129407. A volume or open interest of magnitude 99999 or less requires no adjustment.
