MANAGING YOUR PORTFOLIO ELECTRONICALLY (AND ORDERING HISTORY OR SENDING MESSAGES)

Here are a few hints designed to be
helpful that should facilitate the use of
our CUSTOMER SUBSYSTEM and its associated
options.

Since portfolio changes and history
orders can be both time-consuming and
expensive for the customer to execute
verbally over the telephone, it is highly
recommended that this electronically driven
utility be used to communicate your
intentions concerning your account. By
using this utility, most of the time spent
and virtually all of the additional long-
distance charges for making a call to the
Customer Service Department can be saved
(including the \$5.00 charge for making a
portfolio change over the phone and \$10.00
minimum for histories ordered by phone).

Three main areas of interest are:

1. CHANGE USER PORTFOLIO

- a. Always specify "D" in Daily/-
Weekly/Monthly field when making a
portfolio addition or deletion.
CSI currently delivers daily
updates only.

2. ORDER HISTORICAL INFORMATION

- a. Orders for 6000 to 7000 series
stocks should be ordered using the
message utility described below.
- b. The delivery year (Dv/Yr) should
be specified with "12" (December)
and the current year (e.g. 12/88)
when ordering stocks or indices.
The delivery month (Dv/Mo) "12" is
a numeric convention we arbi-
trarily require for stocks.
- c. To specify either the first or
last day on file (or through the
current date on an active

R QUICKTRIEVE is a registered trademark of
Commodity Systems Inc.

contract) the respective entry fields should remain "999999".

- d. Designate a "P" if histories are to be collected via phone modem. If a "P" is not designated the default Quicktrieve assumption will be "D" for disk.

3. ENTER MESSAGE FOR CSI

- a. This function allows a maximum message length of 232 characters for messages such as "please start history in file 1", "send 5.25 disks via Federal Express", or "run history including tonight's close". Many customers would save the long-distance charge for the first-minute by using this utility. The phone call required to instruct CSI for any of the above messages typically lasts less than one minute...

Finally, after all changes, orders, and/or messages have been typed, the work done (created file image) is saved to a temporary file. Later, when you next select "Collect Daily Data" from the Main Menu, and the prompt "Do you wish to send work done in the Customer Subsystem?" appears, a "Y" response should be specified (for YES). The pre-created file image will then be sent via your modem during the routine on-line collection process. This is an efficient and effective procedure because portfolio changes are input directly into CSI's mainframe and are virtually guaranteed to be included when the subsequent day's data is accessed. You also avoid the pitfalls of verbal communication.

CSI ERROR REPORT
MAY 1988

The following errors were found after the data was first released. They may or may not affect a user depending upon the time of access. The figures would print represent the corrected values. The total and individual volume and open interest are presented in raw form ready for input into your IBM computer. The scientific notation requirement of QUICKTRIEVE would require a raw open interest value of 294070, for example, to be stored as 129407. A volume or open interest of magnitude 99999 or less requires no adjustment.
