CSI SURVEY RESULTS

The CSI staff would like to wish everyone a **HAPPY EASTER**. We will be closed for voice contact **GOOD FRIDAY, March 24th**.

Our October'88 survey of software enhancements received a splendid response.

The study revealed that over 85% of the respondents are hard disk drive users, and over 60% are non programmers.

Based on these findings, you can expect the following enhancements to be incorporated into our **QUICKTRIEVE** products over the upcoming months:

It should be noted that these improvements will be made available for IBM (or compatible) users with 1.2 mg (or higer) floppy disk drives as well as hard disk drives.

Users with 360k floppy disk drives can enjoy the many features available on **IBM QUICKTRIEVE version 3.1**.

FBI PROBE OF CHICAGO MARKETS

Deletions to the Stock Data Base

Page 2

Needless to say, the FBI probe may have identified floor traders who have abused certain privileges that hurt outside speculators and other interests, but the entire profession should not be indicted for the illegal acts of a few. We see the investigation as a positive event that should broaden trading and perhaps pave the way for a more efficient market that will provide an auditable computer matching of market orders. Hopefully this will tighten bid/ask differentials and raise the win/loss ratio for market participants.
