QUICKTRIEVE/QUICKMANAGER 4.0

We have several Beta copies of this new and improved package in the field. The manual has been completely reprinted, and will be offered in an attractive sleeve and binder for only \$39.00 to new customers and \$25.00 for existing customers. The new commercial quality software and manual are professionally prepared to enhance user acceptance.

Among other things, this new product will make calling our data base as effortless for foreign users as it now is for domestic customers. A collection of dialogue files will assist with call sequencing from one network to the other to gain access through a number of different networks or long distance without the need to manually introduce each dialogue file. Foreign users, for example, will be able to accomplish direct access through Tymnet and Compunet without going through your local PTT. For PTT users, a file is made available to access our data base through Telenet. We can now prepare dialogue files from here in the U.S.A. by calling from our offices here to your country's local access point and connecting to our computer. This facility makes it possible for us to troubleshoot any difficult accessing problems.

MUTUAL FUND DATA BASE

We are compiling a ten year data base of the majority of all mutual funds. The base will produce daily net asset values, quarterly dividends and annual capital gain payments so that users may readily adjust data to account for such payments. We have been compiling the information now for a couple of months and we hope to be prepared to offer such data to our customers some time next year. We hope to also provide software to simplify the analysis of alternative funds.

LARGER THAN NORMAL ERROR REPORT

For equity market users, please access the correction file sometime prior to November 20th to benefit from the corrections made to our data base stemming from the market drop and activity of Friday, October 13th and Monday, October 16th.

R SM QUICKTIEVE, QUICKMANAGER are registered trademarks of Commodity Systems, Inc.

The exchanges were so busy and volume was so large and delayed on those dates that information for many stocks was lost to the ticker tape subscribers. Although all the information is now corrected, certain highs and lows were initially quoted in error.

ADVERTISEMENTS ENCLOSED

We have enclosed advertisements for the following products and services: *RELEVANCE III Advanced Market Analysis* designed by R. Maynard Holt, *System Writer Plus* by Omega Research, Inc., *Trend Analysis Software* developed by Jerry Favors and *Doug Ingram and Market Optimizer* offered by Jeff Rickerson of InterFund Financial Management Corp.

CSI accepts advertisements to accompany our News Journal for the sole purpose of defraying postage cost.

ADDITIONS TO THE STOCK DATA BASE

CSI ERROR REPORT **OCTOBER 1989**

The following errors were found after the data was first released. They may or may not affect a user depending upon the time of access. The figures in *bold italic* print represent the corrected values. The total and individual volume and open interest are presented in raw form ready for input into your IBM computer. The scientific notation requirement of QUICKTRIXE would require a raw open interest value of 294070, for example, to be stored as 129407. A volume or open interest of magnitude 99999 or less requires no adjustment.
