CSI ERROR REPORT
DECEMBER 1989

The following errors were found after the data was first released. They may or may not affect a user depending upon the time of access. The figures in bold *italics* print represent the corrected values. The total and individual volume and open interest are presented in raw form ready for input into your IBM computer. The scientific notation requirement of QUICKRIVE would require a raw open interest value of 294070, for example, to be stored as 129407. A volume or open interest of magnitude 99999 or less requires no adjustment.
